## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 1/23/04 is acknowledged and considered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Bugge (5,025,779). Bugge disclose a device as claimed, including a first arm (frame portion connecting to blade 2), second arm (frame portion connecting to blade 1), a frame (6) connecting the first and second arms, a rib offsetting device (including member 9, 10).

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bugge '779 in view of Coker (5,363,841). Bugge disclose all the limitations of the claims except for the presence of fingers extending away from the blade (1, 2). Coker discloses a retractor

including blades with fingers. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Bugge's blade by having fingers extending from the blade in order to provide a better gripping characteristic for the blade such that the fingers grasps the tissue and locks/parts the tissue aside.

***Allowable Subject Matter***

5. Claims 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
